English Hindi Malayalam Tamil

## Skills

ReactJS NextJS HTML/CSS  
Javascript Web Designing  
Golang C++ C NodeJS

## Projects

### Class Monitor

College Final Year Project

A system that uses CCTV footage to identify violent behaviors among students.

- Photographs those moments and sends a message to concerned officials of the establishment.
- It can be used as an add-on application over an existing surveillance system.
- The system comes with a website where the authorized personnel can view all the details.

### Students Data Management

College Mini Project

A website designed to store a whole institution's students' data.

- The website has role based login.
- Teachers can record students' academic details.
- When implemented it can reduce manual labour and confusions by 70%.

## Achievements

### Won Hackathon

Local Hack Day

Won the hackathon for creating an automatic facial recognition attendance system. The system was capable of marking attendance using CCTV footage. This can reduce man labour by 40% and can also improve time management in classrooms.
